## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 20 and 43 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claims 20 and 43 are drawn to semiconductor devices but improperly depend from method claims and fail to further limit the method claims because there are no limiting method steps present in the claims.
2. Claim 37 is objected to because of the following informalities: In line 6, "later" should be replace with --layer--. Appropriate correction is required.

### ***Allowable Subject Matter***

3. Claims 13, 15-19, 37-42 and 44 are allowed.
4. The following is an examiner's statement of reasons for allowance:  
Regarding claim 13, the prior art of record either in single or in combination failed to anticipate or render obvious the limitations of etching the conductive base via the holes.

Regarding claim 37, the prior art of record either in single or in combination failed to anticipate or render obvious the limitations depositing a thin insulating layer on the conductive base and formation of a plurality of openings in the thin insulating later, each opening being located opposite a conductive block, before the deposition of the masking layer. Therefore, Oh does not disclose or suggest "a method to produce conductive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
